Highlights:
- Fully automatic machine set-up
- Operator friendly
- Easy cleaning of gluing system
- Maintenance free
- High degree of adaptability
- Modern industrial design
- Sturdy construction

Other machine versions:

ML-SYSTEM NET 52/4 - CONTINUOUS
with cold glueing device for A3 landscapes to DL (1-up & 2-up)

Specifications:

Paper sizes:
- NET 38:
  - max. 38 x 65 cm (PBA)
  - min. 7 x 12 cm (PBA)
  - max. 36 x 75 cm (FSA)
  - min. 10 x 12 cm (FSA)
- NET 52:
  - max. 52 x 85 cm
  - min. 10 x 12 cm

Fold length: min. 3.5 cm

Paper weight: 60 to 180 GSM (for single parallel fold)

Speed:
- with gluing: max. 160 m/min.

Technical improvements may be introduced without previous notice.
prestigeFOLD NET 38 + 52
Cold Glue Sealer

Mailings and other complex products can be produced profitably with standard folding machines whose application range is extended by means of supplementary equipment. Folding machines that are equipped with gluing devices and timed heads for perforating and cutting as well as further modules are quickly ready for this type of applications. The advantage is that these machines cannot only be used for specific applications, but also for all common jobs.

MB Bäuerle offers various technical possibilities and detailed solutions specifically for these applications.

prestigeFOLD NET Features:
- Fully automatic setting
  - Fold units: Automatic setting of alignment rails, fold plate stops, deflectors and fold rollers
  - Delivery: Automatic setting of hold-down rollers
- Commands are entered at the central touch screen panel
- 20 standard folds are pre-programmed
- Individual programming of other folds
- More than 200 jobs can be saved in the memory
- Paper thickness is determined by means of paper thickness sensor
